AMENDMENT AFTER FINAL

IN THE CLAIMS

Please amend the claims, as follows.

23. (Canceled) ~~Multimedia interface, comprising:
— an integrated circuit (IC) chip;
— a block of reconfigurable logic incorporated on the IC chip; and
— a block of media processor with a virtual instruction set capable of implementing a variety of multimedia algorithms incorporated on the IC chip separately from the reconfigurable logic block.~~

24. (Currently Amended) The multimedia interface, according to claim 23 59, further comprising audio and/or video CODEC incorporated on the IC chip.

25. (Currently Amended) The multimedia interface, according to claim 23 59, further comprising a phase locked loop (PLL) circuitry incorporated on the IC chip.

26. (Currently Amended) The multimedia interface according to claim 23 59, further comprising a programmable, fast serial interface core to interface to a serial interface standard incorporated on the IC chip.

27. (Currently Amended) The multimedia interface according to claim 23 59, further comprising a programmable CPU interface core incorporated on the IC chip.
